

MiTOWER CONNECT

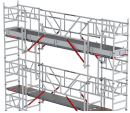

✓ Professional use

- Working platform between two MiTOWERs
- Strong, sturdy and lightweight
- Suitable for MiTOWER and MiTOWER PLUS

MiTOWER CONNECT: Working platform between two MiTOWERs

The MiTOWER CONNECT is a useful addition to the MiTOWER or MiTOWER PLUS. With just a few parts you can build in a short period of time a working platform between the two towers. It's allowed to assemble the MiTOWER CONNECT by a single person, until a working height of 6.2 meters.

Create a larger working platform with standard parts

The working platform can be created from guardrail support stands (301227) in combination with SQ guardrail attachments for walkthrough frame (301228). Next to that you would need a walkthrough frame, RS5 platforms and Safe-Quick® GuardRails
