

Telescopic platform Velocity, Leveler & Black Pro Leveler

✓ Professional use

- Handy accessory for the Velocity, Leveler & Black Pro Leveler
- Create compact scaffolding from your folding ladder

Telescopic platform. Create scaffolding from your Velocity, Leveler & Black Pro Leveler folding ladder

The telescopic platform is a handy accessory for the Velocity, Leveler & Black Pro Leveler. The platform allows you to turn your folding ladder into scaffolding. The folding ladder can be split into two separate sections. If you then position these in an A-position, you can easily place a platform in the middle. And, because the platform is telescopic, you can set the length yourself. The telescopic platform is a useful addition to the Velocity, Leveler & Black Pro Leveler.
