

Atlas combination ladder

✓ Professional use

- For intensive, professional use
- Lightweight I-profile
- Bigger standing surface due to unique D-shaped rungs
- Anti-slip standing surface, more standing comfort

Atlas combination ladder. The best ladder for professionals.

The Atlas is equally strong as stable. The light weight I-profile is specifically designed for intensive use. Moreover, this combination ladder is also multifunctional. Use it as an extension ladder along the wall or simply switch it to an A-position. Perfect for every job.

The unique D-shaped rung is firmly in place thanks to its special shape. Moreover, the deep standing surface gives you more standing comfort and the stabiliser beam also provides additional stability. The ladder is easy to extend in and out through the automatic locking swing hooks and the top rollers at the ends.

Light in weight, big in range

Thanks to the I-profiled stiles, this ladder is the lightest of its kind. It is precisely thanks to this profile that you can easily slide the Atlas reform ladder in and out.

For every job an Atlas

The Atlas combination ladder is available in 2- and 3-part version, in various lengths up to 9.35 meters. You can easily slide the three-part reform ladder through the top rollers.

Safe at heights

If you choose for safety, then you choose for the Atlas combination ladder. The push-resistant spreading lock prevents the three-part ladder from folding in while you're using it.

More possible with extra length

Through the generous rung distance of 27 cm, the Atlas has an advantage over regular ladders. You reach farther and stand higher. Exactly what you need.

Simple and compact

Thanks to the lightweight aluminium, the Atlas is easy to move. The shorter ladders are folded in very compact and easy to transport.

Unique deep D-sports

The ladder has a deep D-shaped rung, unique to Altrex. The large anti-slip standing surface gives you more space and therefore more standing comfort.
