

## Kibo combination ladder

### ✓ Professional use

- For professional use
- Bended beams, extra stable
- Lightweight ladder with square rung

### Kibo combination ladder. Lightweight ladder for professional use.

The Kibo is the professional lightweight ladder. Its light weight makes it very handy and easy to set up. The bended beams ensure that you can safely carry out your job anywhere. This ladder is equipped with a square rung tube profile, which makes it extra strong and durable in use. With the Kibo combination ladder, you can experience your guaranteed reliability and comfort, at any height. You can rely on Altrex.

The Kibo combination ladder is available in 3-part versions with 8, 10, or 12 rungs. Regardless of the compact dimensions of the ladders, with working heights of up to 8.3 meters, you can achieve maximum results. The combination ladder is multifunctional. Put the ladder in the A position or use it as a push-up ladder along the façade. Made for every job, so you can always work safely.

#### Light in weight, great in reach

Do you want your ladder to be easy to lift and to reach the highest altitudes? Then you need the Kibo combination ladder. This ladder is remarkably light for its class, but at the same time very robust.

#### Square rung for improved standing comfort

The rungs of the Kibo combination ladder measure 2.8 x 2.8 cm and ensure that you can stand comfortably during your work. With the durable nature of the material, these rungs also last for years, even with the most intensive use.

#### Bended beams with extra-wide feet

The bended beams at the bottom of the ladder provide more stability and make it easy to place your ladder in any desired position. And, with the extra wide feet, the ladder has even more grip, giving you even more contact with the surface you are working on.

#### With the generous rung to rung distance, you reach even further

The Kibo combination ladder has a standard rung to rung distance of 28 centimeters. This generous distance allows you to stand higher and reach further. So every job is a piece of cake!

## Product specifications

Item number	Rungs	storage length (m)	extended length (m)	working height freestanding (m)	max working height general (m)	weight (kg)	stabiliser	spread safety	top rolls	floor surface (m2)	EAN	max loading (kg)
