

Nevada combination ladder

✓ Professional use

- For intensive, professional use
- Unique ergonomic ladder with ERGO-GRIP
- Extra high (30 mm) and deep rungs (42 mm) for extra comfort and support

Nevada combination ladder. Ergonomic box-profiled ladder for professionals

The most comfortable ladder. The Nevada has many smart features. The ergonomic box-profiled shape with ERGO-GRIP provides a sturdy, natural grip. Extra high rungs offer optimum support for your shins. This is a multifunctional reform ladder. Use it as a sliding ladder up a façade or set it up in the A-position (Reform position) Perfect for every task.

The extra deep rungs with anti-slip standing surface ensure increased comfort and the bended beams provide stability. This ladder is easy to use in its push-up position due to the plastic guides and the top rolls at the ends. The top quality black coating is attractive as well as dirt-resistant.

Comfortable ERGO-GRIP

The box profile is ergonomically designed. This ensures a natural grip. Handy if you use it frequently.

For every job a Nevada

The Nevada combination ladder is available in a 2 or 3 part version, in various lengths up to 10.20 metres.

Working safety at height

If you're choosing safety, choose the Nevada combination ladder. The self-locking spreader protection prevents the ladder from unexpectedly closure during use.

Achieve more with extra length

The great rung-to-rung distance of 28cm allows the Nevada reform ladder to take you to unparalleled heights.

Extra high rungs

The ladder has extra high rungs (30 mm). They offer support to your shins. Providing greater comfort if you are using the ladder for an extended period.
