

Mobile industrial platform stepladder

✓ Professional use

- Large platform, with safe platform guardrails
- Mobile - with wheels and handy guardrails
- Specific requirements can be accommodated

Industrial platform stepladder. Modular stepladder for the warehouse or maintaining machinery

The Altrex industrial platform stepladder is a modular system which offers infinite possibilities. Ideal to use in a warehouse or for maintenance work on a machine or production line. The industrial platform stepladder can easily be moved thanks to its 2 or 4 wheels. Choose the angle of incline and width of the treads that suit your job and requirements.

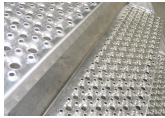

Easy to move

The handles and wheels ensure that the treads are easily moved. Handy if your work involves several locations. The industrial platform stepladder is available with 2 or 4 wheels.

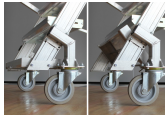

Your requirement, your choice

The industrial platform stepladder with 2 wheels has an angle of incline of 60 degrees. With 4 wheels, you can choose 45 or 60 degrees. You can also set the width of the step: 60, 80 or 100 cm.

Punched profiled or anti-slip extruded treads

What finish suits you? Extruded treads with anti-slip for comfort when standing or a punched profiled treads so that dirt can pass through more easily. You make the choice.

Optional: unique braking step

With this unique braking step you easily brake and release an industrial platform stair. The braking step replaces the standard swivel wheels with brake, which you need to be brake individually.

Custom-made

A deviant angle of incline, special height or guardrails customised to your needs? No problem! The modular system offers many options. Contact our customisation specialists to discuss the various options. We will be pleased to help you on your way to the best solution.
