

Giant Total Black stepladder

✓ Private use

- Extra-large treads for optimal standing comfort
- Dirt resistant thanks to black anodised styles
- Compact to store

The Giant Total Black. A compact household stepladder

The Giant Total Black is the 'smallest' of the family of stepladders. Ideal when you have to go just one step higher. This household stepladder is sturdy, durable and extremely compact to store. And therefore invaluable with all small jobs in the house.

The Giant Total Black is small in size and big in stability. The reliable construction and the extra-large 20 x 30 cm treads ensure optimal standing comfort. The Giant feels great because of anodizing. Therefore this household ladder is also dirt-repellent. Once folded it takes up only 3,5 cm of space, meaning it can be stored in any corner of your house.

Attractive design

The Giant Total Black has a contemporary look due to black anodizing. It also feels good.

Lightweight and compact

The lightweight stepladder is extremely compact. Handy to store or move.

Always stable

The extra wide treads are finished with an anti-slip profile. This way you are always comfortable and safe on the Giant.

Product specifications
