

## Step-over-platform

### ✓ Professional use

- Angle of inclination: 45 or 60 degrees
- For access to or passage through machinery or roofs
- Specific requirements can be accommodated

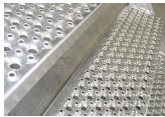

### Step-over platform. Modular steps for access to or passage through machinery or roofs

The Altrex Step-over platform is a modular system which offers infinite possibilities. Ideal for accessing or navigating through machinery or over parapets on a roof. Choose the angle of incline and width of the treads that suit your task and requirements.

#### Your requirement, your choice

The angle of incline on the step-over platform is 45 or 60 degrees. You can also set the width of the step: 60, 80 or 100 cm (other widths are available upon request).

#### Profile punched or anti-slip

Which finish suits you? Anti-slip for comfort when standing. Or a punched finish so that dirt can pass through more easily. You make the choice.

#### Tailored advice

We would be happy to help you make the right choice. Feel free to contact us.

### Custom-made

Need a mobile system or specific dimensions? No problem! The modular system offers many possibilities. Contact our customisation specialist to discuss the options. We will be pleased to help you on your way to the best solution.
