

RoIGuard

✓ Professional use

- All-round protection, extra safety
- Extra-large working platform, more standing comfort
- Equipped with wheels for easy transport

RoIGuard. Platform ladder with extra-large surface

The RoIGuard is a platform ladder where safety comes first. With the extra-large platform (600 x 425 mm) you are always safe and comfortable. In addition, you always work with your hands free due to the all-round protection. Ideal for every warehouse.

The telescopic outriggers (stabilisers) increase stability. In addition, the RoIGuard is also telescopic extendible with one of the extension sets (optional). And that is useful if for example you need to work on uneven surfaces.

Safe and functional

The RoIGuard has a convenient place for your tools. This way you will always have your tools on hand.

Easy to move

With the wheels under the RoIGuard, the stairs are very easy to move. Useful if you need to work in multiple places.

Optimal standing comfort, always protected

You stand comfortably on the RoIGuard. This is due to the extra-large standing platform. In addition, you're always protected all round.

Telescopic extendable

Do you have to work on uneven surfaces? With the optional extension set, you ensure the RoIGuard is telescopic extendable.
