

X-Pro® multi-functional stepladder

✓ Professional use

- Stepladder and work bench in one
- Robust, functional and unique design

Altrex X-Pro®. Stepladder and work bench

Never again have to take a stepladder and a work bench to a job. With the X-Pro®, you have two things on one. This unique stepladder is innovative, robust and also easy to move and store. The X-Pro® is the ideal workmate for every professional.

The unique design means that your stepladder can also be used as a work bench. Both standing up and lying flat. The robust construction, the patented hinge system and the anti-slip feet provide maximum stability. With the handle in the top tread, the treads are easy to use and move. The X-Pro® is a multifunctional stepladder for the professional craftsmen.

Work bench for all your materials

The X-Pro® has three V-shapes. This makes the work bench suitable for storing all your materials. Large or small.

Worktop that stays horizontal

The smart design of the X-Pro® means that you always have a horizontal worktop. Even if the stepladder is on its side.

Compact and easy to transport.

The treads are easy to collapse using the handle in the tread. Once folded up, the X-Pro® is extremely compact.

Strong and stable

Extra strong double-box profiled treads make the treads robust and sturdy. The anti-slip feet and treads provide stability and safety.
